INTRODUCTION

Hello,

Solomon Adeyemo here.

I am the owner of BusinessEscalate.com and some other websites. I have been online for a while now and I have made some money online as well. But it took me some time to figure out how to really make money online. I spent a lot of money buying all kinds of eBooks and I have read many of them. But the system I'm about to show you today was discovered by myself by searching the internet. I will tell you more about that later.

What I have discovered is that creating my own product is very important to make money, but more important than that is getting highly targeted traffic to buy the product. So, even if you don't have a product of your own but you can get real traffic, you can make real money with CPA and affiliates products as well. But if you find a source that will provide you with plenty of buyer traffic without paying a dime out of your pocket for it, grab it so quick.

Making Money online is something that many people dream of but could not actually bring it to reality. Many have tried hard and spent a lot of money buying all kinds of "make money online" eBooks and other products but all the effort was not profitable. This case study is to show you how easy it is to make money online with your own product especially when you don't have a list and you don't have money for traffic and you do not have "super" affiliates at your side.

Today, I'm going to introduce you to a website you might have never heard of before, or you may not know how you can make money on this website. I

believe creating a product is not actually the big problem for many, but getting the buyer traffic without spending any money to acquire them. Yes, I mean it, you do not spend money on ads or banners or any means to bring traffic to buy your product.

The product you will sell have to be wordpress related such as wordpress themes or plugins. Where will you sell your products at? No, I'm not talking about themeforest website. Well, I am talking about [AppThemes.com](https://www.AppThemes.com).

HOW MUCH HAVE I MADE?

As it is stated in the subtitle of this eBook, I have made \$1,345.00, and that's after the appthemes.com have taken their own share. Firstly, I want you to know that the products that earn money on autopilot or the marketplace that brings free traffic to your product without spending any money is the best business you want to get into and that is serious. I have done it in different markets and I want to show you how you can do the same. Here is the screenshot from inside my account for the product I have on AppThemes.com to show you the Sales inside my account.

WHY IS THIS SYSTEM GOOD FOR YOU?

AppThemes.com is a wordpress site that sells both themes and plugins and at the time of writing this, the site boasts of having over 35,000 paying customers which I can refer to as a buyer list. Remember, buyers will buy again and again, because they want to learn more.

To provide traffic on your own is hard work, because to get a buyer list you need to test and test and test and find out what converts better. But if you are on a budget that is not what you want to spend all your time and budget on.

There are lot of reasons why I love this site.

1. There is no need for an exorbitant, highly expensive sales page. The site already provides a simple to create page as a sales page which you can do within 10 minutes.
2. There is no need for marketing: Keep your marketing money, because you don't need to market yourself. The constant site visitors will find your product and they will buy it. Don't get me wrong, if you have money to market your products on that site, please go for it. It means more sales for you. But to be honest with you, I have spent \$0 to market my product on that site and I still make money every month.
3. It is your product and your asset: This means that the product belongs to you which you can take it to another marketplace if you want. And you can sell it for any amount you want. Another cool part about your product is that you can transfer the product to your kids, how about that?

4. Another thing is that all purchases on this website is final. No refunds. Once you make the sale, it is your money.

You may be thinking that the amount I show you is small, but remember you can have as many products as you want on that site. I only have one product that makes that amount. And you are not spending a dime on traffic to make that money that is coming in. The only amount you spend is the initial amount you spend to create the product, and that's it.

And remember, depending on how useful your product is to these wordpress site owners, you can easily make \$300 per month per product and if you have 10 products, that's a total of \$3,000 coming to you every month for doing nothing. This is actually a system that is equal to "Work Once, Get Paid Over And Over Again" System. And I love that.

To learn more about this system on how to set it up correctly, hit the buy button below and for just **\$7** you can download it immediately. You will also get a video that actually shows you how to set up the system correctly. In this video, I will show you how I come up with the idea for products to sell on this site and I have three surprise bonuses for you as well.
